

CALL FOR EXHIBITORS AND SPONSORS

INTERNATIONAL CONFERENCE ON FAN NOISE, AERODYNAMICS,
APPLICATIONS AND SYSTEMS

27 to 29 June 2022, Senlis, France

www.fan2022.org

Following on from the great success of the 2012, 2015 and 2018 events, we are pleased to announce that the next 3 day conference will be held on 27 to 28 June 2022 in Senlis, France.

This event will be a forum for fan and system designers, manufacturers and operators, with the aim of improving our understanding of fans and their system interaction. The Fan 2022 conference will follow a format with three separate, but complementary tracks.

BEING AN EXHIBITOR OR A SPONSOR

Your involvement with this event is an effective way to network with key decision-makers, helping you to capture your target audience when they are in the frame of mind to do business. Our flexible opportunities allow you to:

- Showcase new products
- Raise awareness of your organization
- Increase brand awareness
- Influence other organizations' buying decisions

The previous edition in 2018 has gathered 300 participants from more than 20 countries (2/3 from industry and 1/3 academics) and 14 exhibitors.

The exhibition will be situated close to the conference rooms. Coffee breaks and lunches will be served at the venue. An opportunity will be given to each exhibitor to make a short presentation during the exhibitors session planned for the first day of the conference.

CONFERENCE SCOPE

This three-day conference will include keynote lectures and technical presentations. The technical presentations will be organised as three technical tracks, focusing on fan applications and systems, fan noise and fan aerodynamics. All types of fans, such as those used in industrial processes, HVAC, electronic equipment, household appliances, automotive and traction fall within the scope of the conference. Conversely, high speed fans in aeronautical propulsion applications will not be included.

Organized by

TRACK SCHEDULE

Track One: Fan Application and Systems

- Compliance with legislation & regulations
- Harmonization of fan standards worldwide
- Connectivity technologies
- Digital services and new business models
- Predictive maintenance
- Operation and maintenance considerations
- Motors & drives
- Specialized fans for different applications
- Retrofit and upgrading existing fan installations
- Fan system effect
- Energy related topics (e.g. air curtain effectiveness)
- Case studies (e.g. tunnel ventilation)
- Improving fan sizing/selection
- Structural mechanical aspects (vibration, fatigue and flutter, preventive maintenance, condition monitoring)
- Transient phenomena
- Best practices
- Optimization of fan systems
- Decentralized fan systems

Track Two: Fan Noise

- Aerodynamic fan noise generation mechanisms
- Structure-borne noise
- Dynamic force transmission
- Experimental methods for characterizing noise sources
- Noise source localization
- Design for low-noise fans
- Noise prediction by analytical/numerical models
- Optimization of fan installation to reduce noise
- Psychoacoustics

Track Three: Fan Aerodynamics

- Development of analytical and computational methods
- Validation and verification
- Application of analytical and computational methods for fan analysis, design and optimization
- Physics of aerodynamic losses
- Inverse design
- Unsteady CFD simulations including LES and hybrid RANS/LES
- Fan design for improved efficiency
- Impact of emerging technology on fan design
- Experimental methods in fan analysis and design

CONGRESS CENTER OF CETIM

Fan 2022 conference and exhibition will take place in the Congress Centre of Cetim, situated at Senlis. Located about 20 minutes by car from Charles de Gaulle airport in Roissy (Paris), the conference centre is modern, well equipped and conveniently located for those travelling to the conference both within France and internationally.

Organized by

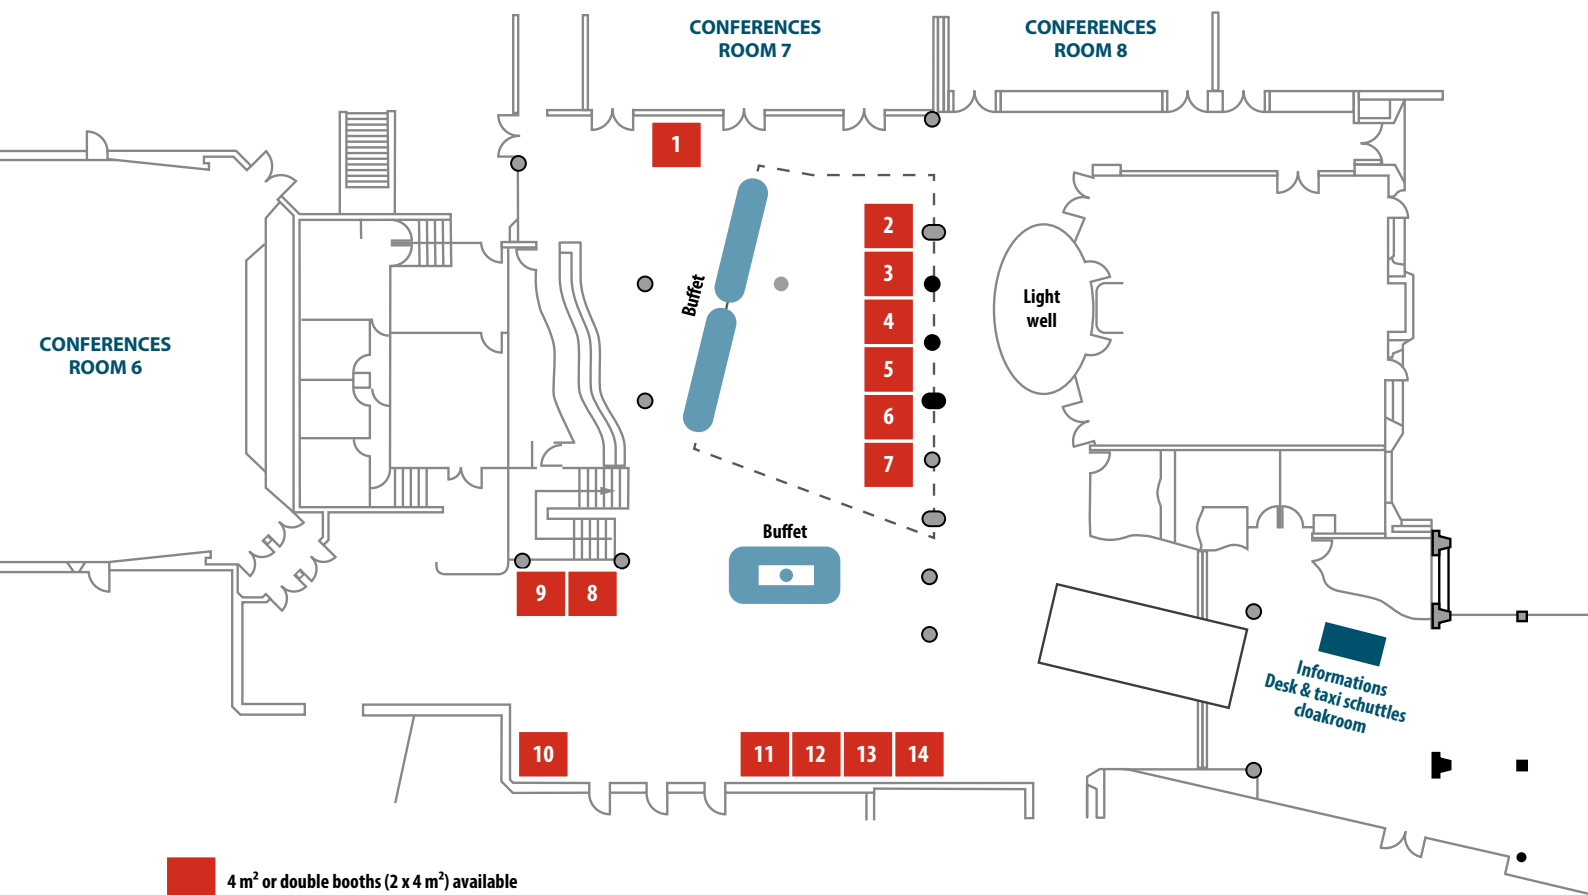

EXHIBITION BOOTH

Dimensions

- Single Booth : 4 m² (2 m x 2 m)
- Double Booth : 8 m² (4 m x 2 m)
- Openings: 1 face or 2

Equipment

- 1 counter, 1 high stool, 1 display
- 1 lighting track with 2 spots 100 watts
- 1 sign
- Structures : rigid white panels height 2.25 m
- Electricity : 1 connection (2 500 watts)
- Wi-Fi connection

**Cetim - 52, Avenue Félix-Louat
60304 SENLIS - FRANCE
Tel. : + 33 / 970 821 680**
